## SUMMARY

Software engineer with 3+ years building production frontends for fintech (internet banking PWA, ~12k DAU) and B2B SaaS (100k+ users). Vue 3, TypeScript, Nuxt, Next.js, Go. Strong on SSR, design systems, and measurable performance (Lighthouse +30%, TTFB -25%). Open to full-time and contract roles, remote-first.

## EXPERIENCE

**Software Engineer · Target Zero (IKOD)** Feb 2026 - present

- Build backend and fullstack features for an enterprise SaaS platform (100k+ users, occupational safety and compliance, TypeScript).
- Develop API services and core business logic under enterprise-grade production constraints.
- Contribute to scalability and system architecture of a multi-module SaaS.

**Fullstack Software Engineer · Yoorent (yoorent.kz)** Nov 2025 - Feb 2026

- Delivered backend services and Vue 3 / TypeScript frontend features for a B2B SaaS platform serving tens of thousands of users.
- Improved scalability and stability under active production load.

**Software Engineer · AEB IT LLC (albank.ru)** May 2024 - Oct 2025

- Shipped internet banking PWA (Angular, Vue 3, TypeScript) for public site (~12k DAU) and internal admin portals across the banking ecosystem.
- Migrated legacy frontend to Vue 3 + TypeScript without downtime; raised Lighthouse ~+30% and reduced TTFB ~-25% on key screens.
- Built shared design-system components (REST / GraphQL, Storybook); supported high-traffic Bitrix public site (peaks ~8k concurrent).

**Fullstack Engineer · SIVIG LLC (Yakutsk)** Mar 2023 - Mar 2024

- Designed booking workflow and built operational Kanban UI for a B2B SaaS property-management platform (Next.js, TypeScript, SSR).
- Implemented RBAC across frontend and backend; integrated Yandex Maps for property layer; delivered platform to pre-production.

**Frontend Developer · InRoad / Sinetspark (Yakutsk)** Jul 2022 - Feb 2023

- Built Vue 3 / TypeScript UI with Google Maps integration for spatial data views and marker management on a client-facing web platform.
- Cut first-load time ~30% via lazy-loading and asset tuning; ensured cross-browser responsive layouts.

## PROJECTS

**WiseDream Portfolio** wise-dream.site

Personal portfolio at wise-dream.site — designed, built, and operated end-to-end as a showcase of production-grade frontend work.

**Yakutia Resident Card** card.sakha.gov.ru

Public-facing site for the Yakutia Resident Card program at card.sakha.gov.ru — built as part of the AEB ecosystem.

**Loyalty Program "SVOI"** svoi.albank.ru

Frontend refresh of AEB's customer loyalty portal "SVOI" at svoi.albank.ru.

## EDUCATION

**M.K. Ammosov North-Eastern Federal University** — Yakutsk, Russia

Bachelor's program in Applied Mathematics and Computer Science · 2022–2025

3 of 4 years completed while working full-time as a software engineer

## TECHNICAL SKILLS

- **Core:** TypeScript · Go · Python
- **Fullstack:** Vue 3 / Nuxt · React / Next.js · Angular · Storybook · Tailwind CSS · PWA
- **Backend:** Go · NodeJS · Prisma · Gorm · Gin · Express
- **API / Networking:** REST · GraphQL · WebSockets
- **Infrastructure:** Vite · Webpack · Docker
- **Maps:** Google Maps API · Yandex Maps API
- **UI / Quality:** Design Systems · ESLint/Prettier · Vitest/Playwright

## LANGUAGES

Russian (Native) · English (Professional working proficiency)
